Item Code	Description	Pack Size
421799	Alaska Pollock Burgers (3.2 oz)	1/10 lbs
421800	Alaska Pollock Burgers (4 oz)	1/10 lbs

# PURCHASING — GUIDE —

## **ALWAYS BUY WILD ALASKA.**

Only pollock caught in Alaskan waters can be labeled as Alaska Pollock. Fish labeled as simply “Pollock” is typically harvested and processed in Russia or China, and it is often twice frozen and contains additives.

## **ONCE-FROZEN IS BEST.**

Wild Alaska Pollock is typically once-frozen shortly after it is caught in order to lock in freshness and flavor. In contrast, twice frozen pollock may suffer from shrinkage and degradation due to water loss, and it is likely to contain additives. The additive most often found in twice-frozen pollock is Sodium Tripolyphosphate (STPP), which is used to prevent water loss in twice-frozen products.

## **DEEP SKINNED VS REGULAR SKINNED.**

Deep-skinned fillets are slightly whiter and produce a better yield, while regular-skinned fillets are more common and cost-effective. Both are good choices depending on your needs.
